

13<sup>e</sup> Conférence Annuelle du Cajou de l'ACA

**FAVORISER LES SYNERGIES  
INFLUENCER LA  
DYNAMIQUE DU MARCHÉ**

**Dar es Salaam & Zanzibar  
Tanzanie**

*7-9 novembre 2019*

Le Conseil de Régulation, de Suivi et de Développement des Filières Coton et Anacarde

**Innovative Production By  
Rehabilitating Orchards in  
Cote d'Ivoire**

**Dr GNIRE MARIAM OUATTARA , Director in charge of Production CCA, [gnirefr@yahoo.fr](mailto:gnirefr@yahoo.fr)**

**6 November 2019**

# BACKGROUND AND RATIONALE

- Rapid growth of Ivorian production.
- **From 19,000 tonnes** in 1990, the production has increased to more than **700,000 tonnes** in 2017.
- However, the production techniques are extensive.
- Consequence: low level of output.

# OBJECTIVES OF THE REHABILITATION

Enhance the productivity of the orchards.

In specific terms, it consists in improving:

- The average output per hectare (**from 500 kg to + 800 kg**),
- The quality of the raw cashew nuts (**KOR higher than 48**).

According to innovative production techniques (the rehabilitation of orchards through the use of high-yielding planting material).

# REHABILITATION STRATEGIES

## Key Stages:

- Capacity building of research and extension services, including the mastery of rehabilitation techniques;
- Large-scale awareness raising and training of producers;
- Training and support for the establishment of private operators who have specialized in cashew businesses within the production zones;

# REHABILITATION STRATEGIES

## Key Stages:

- Record-keeping of orchard rehabilitation demonstrations among producers;
- Support for the costs involved in the rehabilitation process;
- Rehabilitation of orchards of producers who are willing and monitoring of operations.
